Use-Case Specification: Customer pays by cash

1. Customer pays by cash

1.1 Brief Description

Customer arrives at the checkout counter with DVD(s) to be rented. The cashier uses the system to record the transaction. The customer wants to pay by cash and gives the cashier money. The cashier enters the cash amount that the Customer gave them. The system presents the amount to be returned to the customer and releases the cash drawer. Cashier deposits the cash amount and returns the change to the Customer. The system records the cash payment. The transaction is successful and the customer paid for the rented DVD(s).
